Reject Duke Energy's net metering proposal - there should not be a minimum monthly bill that applies to rooftop solar owners within Duke's service areas. We should be incentivizing clean solar energy, not adding barriers and unjust fees.

It is unbelievable that Duke is taking this approach. As climate chaos heats up, Duke should be taking the lead in any way it can to prevent the horrible effects of this phenomenon. Don't charge rooftop solar owners more, sell them electricity at a cheaper rate or give them yearly bonuses. What is the purpose of these changes other than to fatten the coffers of Duke Energy??!!
