Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Elisabeth Somervell

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

John Wolfe

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Nancy Gillespie

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Leah McManus

Subject: RE: Docket E-100 Sub 83

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards.

Thank you.

Subject: RE: Docket E-100 Sub 83

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Nathan Moffitt

Subject: RE: Docket E-100 Sub 83

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

robin holmes

Subject: RE: Docket E-100 Sub 83

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Danielle Smith

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Tara Reedy

Subject: RE: Docket E-100 Sub 83

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Pat McCaffery

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change. We had roof-top panels in AZ and only had to turn on our electric water heater once in five years!!!!

Please do not weaken North Carolina's net metering standards.

Thank you.

Subject: RE: Docket E-100 Sub 83

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Subject: RE: Docket E-100 Sub 83

Dear NC Utilities Commission,

The way energy will be produced in the future is changing. Utility companies are in a tough place; their financial model is based in the past when energy is generated in a central location and distributed to customers. In the future, there will be scattered generation with a wide variety of sources/types of generation.

The NC Utilities Commission can signal to utilities and their shareholders that they must prepare for the new reality. North Carolina is a leader in diversifying our energy sources and we intend to be ready for the opportunities which the future brings. Shareholders need to know that the old model is not an option before they will support their executives to take the necessary steps in transitioning their business model.

I have heard that Duke Energy Progress is proposing changes to the current net metering option. This is "penny wise and pound foolish" on their part because it is driven by the urge to continue with the centralized generation model.

Please support our utilities in moving toward the future by oppose this short-sighted effort to change net metering.

Thank you.

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

John Iler

Subject: RE: Docket E-100 Sub 83

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving

fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Edith Coleman

Subject: RE: Docket E-100 Sub 83

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net

metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.
