Dear Mr. David Drooz.

I am writing in response to Docket No. W354, Sub 356 before the NC Utilities Commission in which there is a proposed increase for sewer service in the Kings Grant subdivision which is where I live. If I am reading the information correctly, it appears that the proposed rate increase is 10.55%. I realize that sometimes rate increases are necessary. However, with health insurance costs and other service costs rising while salaries are remaining stagnant I am asking that any rate hike be kept as low as possible. I appreciate you representing us consumers in this matter. Thank you.

Sincerely,

Timothy L. Luper, Jr.
