North Carolina Public Staff Utilities Commission

June 22, 2016

FILED JUN 2 2 2016 N.C. Utilities Commission

Mr. Bruce Sampsell 109 Sierra Drive Chapel Hill, North Carolina 27514-1455

> Re: NCUC Docket No. G-5, Sub 565 – Application of Public Service of North Carolina, Inc., d/b/a PSNC Energy, for a General Increase in its Rates and Charges

Dear Mr. Sampsell:

Thank you for your letter regarding the application of PSNC for authority to increase its rates and charges for natural gas service in North Carolina. A copy of your letter and economic analysis and supporting documents will be given to the Chief Clerk of the Utilities Commission for inclusion in the Commission's files and will be reviewed by the Public Staff.

The Public Staff is responsible for representing the interests of the using and consuming public in utility matters, and we will be participating on the public's behalf in this case. Our accountants, engineers, and financial analysts are conducting a thorough investigation of the application. We will be presenting our findings and recommendations to the Commission at the upcoming evidentiary hearing that begins on August 30 in Raleigh. Representatives of the Public Staff will also be present at the hearings for public witnesses the preceding week.

Again, we appreciate your interest in this matter and the information you have provided. We will take your views into consideration as we conduct our investigation.

Sincerely,

Christopher J. Ayers Executive Director

cc: Chief Clerk

Christopher J. Ayers, Executive Director 4326 Mail Service Center, Raleigh, North Carolina 27699-4326 • 919/733-2435 • Fax 919/733-9565 An Equal Opportunity / Affirmative Action Employer

Bruce Sampsell 109 Sierra Drive Chapel Hill, NC 27514-1455

June 6, 2016

Mr. Christopher J. Ayers Executive Director Public Staff – NCUC 4326 Mail Service Center Dobbs Building Raleigh, NC 27699-4326

Re: Public Service Company of North Carolina, Inc,. Docket No. G-5, Sub 565

Dear Mr. Ayers:

I am responding to a notice of hearing that was included in the envelope with my monthly gas bill for the period ending 5/26/16. I am aware that PSNC, a NC regulated public utility, is allowed to set rates to achieve a just and reasonable rate of return on common equity. But, I see nothing just nor reasonable in their requested ROE of 10.6% based on the enclosed report of ROEs of US and Canadian utility companies from Concentric Energy Advisors for the period 2000 through 2015.

The Data presented in both tabular and graphical form make it very clear that average authorized ROEs for both gas and electric utilities in both the U.S. and Canada have been steadily declining for the past 15 years, consistent with declining bond rates and historically low rates of inflation. The average authorized ROE values for 2015 are all well below the authorized return on equity sought by PSNC in their most recent filing:

PSNC filing request May 1, 2016	10.6%
PSNC Authorized ROE 11/1/2008	8.54%
Average Canadian Gas Utility 2015	9.29%
Average U.S. Gas Utility 2015	9.48%

There is absolutely no sound rationale to support PSNC's 10.6% ROE request in the face of recent authorized levels of ROE from both U.S. and Canadian regulators. In the face of U.S. Treasury 30-year bond yields near historic lows, very low natural gas costs, and inflation rates at or below U.S. government targets, authorized ROE levels should be declining, not increasing. In this economic climate there is no justification for the overall 9.66% increase in operating revenues sought by PSNC in its 3/31/2016 filing of Docket G-5, Sub 565.

I am not available to testify at any of the several hearings scheduled for this coming August, so it appears this letter and attachment cannot be considered competent evidence under the Commission's rules and procedures. Nevertheless, I would like my submission to become part of the public record. I also hope that you and the Public Staff, as statutory representatives of the public in this matter, will carefully read what I have submitted as an ordinary PSNC rate payer, and consider it carefully as you determine what rate increases and authorized ROE percentage are justified in the circumstances.

Sincerely,

Ruce Camprely

Authorized Return on Equity for Canadian and U.S. Gas and Electric Utilities Volume III, May 1, 2015

INTRODUCTION

Concentric Energy Advisors, Inc. (Concentric) is pleased to publish the third edition of this newsletter summarizing authorized returns on common equity (ROEs) and common equity ratios for Canadian gas and electric distributors, Canadian electric transmission companies, U.S. gas and electric distributors, and select bond yields. Many regulators, stakeholders and analysts in Canada consider allowed returns in other Canadian jurisdictions and U.S. utilities when assessing the cost of capital. This newsletter seeks to assist with these inter-jurisdictional comparisons.

This newsletter and supporting database contain the authorized ROEs and common equity ratios for over 40 Canadian electric and gas utilities. For comparison purposes, the newsletter also presents the average and median authorized ROEs and common equity ratios for U.S. gas and electric distributors, as reported by SNL Financial's Regulatory Research Associates.

ROE

Concentric observes that the differential between the median authorized ROEs for Canadian and U.S. gas distributors continues to narrow, from 100 basis points in 2000 to 53 basis points in 2014 and to only 18 basis points through the first three months of 2015. There is a larger gap between Canadian and U.S. electric distributors, at 125 basis points in 2014 and 122 basis points in 2015. Concentric notes that gas ROEs are higher than their electric counterparts in Canada, while the opposite is generally true in the U.S. Median ROEs for Canadian electric transmission companies are 20 basis points lower than those awarded to Canadian electric distributors, but 142–145 basis points below U.S. electric distributors over the 2014–2015 period.

Concentric attributes the closure of the gap between Canadian and U.S. authorized ROEs over the past decade to the resetting and replacement of automatic formulas widely used in Canada, which has generally increased allowed ROEs from previous formula levels. Simultaneously, U.S. ROEs have followed the decline in interest rates and earnings growth projections that drive ROE estimates.

EQUITY RATIOS

While authorized ROEs have converged between the two countries, the authorized common equity ratios have not. In 2014, the median common equity ratio for Canadian gas distributors was 39.3% while the U.S. median was 51.9%, comparable to the difference for electric

distributors which was 40.0% and 50.1%, respectively. Allowed equity ratios for Canadian electric transmission companies are 4.0% lower than their electric distribution counterparts, and 14.0% below U.S. electric distributors.

RECENT DECISIONS

Canadian utility regulators have issued several important cost of capital decisions since the second edition of this newsletter was published in May 2014. Notably, in Alberta, the Alberta Utilities Commission recently issued its decision in the 2013 Generic Cost of Capital proceeding for all gas and electric utilities in the Province. The allowed ROE for Alberta's gas and electric utilities was set at 8.3% for 2015. In addition, the AUC determined that the allowed ROE for 2013 and 2014 would be modified from the previous interim rate of 8.75% to 8.3%. The AUC also reduced the deemed common equity ratio by one percentage point for most Alberta regulated utilities and decided to forego returning to an automatic formula at this time. The Alberta utilities have filed applications to appeal this decision.

In Ontario, the Ontario Energy Board's revised ROE formula established in December 1999 remains in effect but is scheduled to be reviewed in 2015. In Québec, the Régie again decided to allow Gaz Métro to maintain its allowed ROE of 8.9% without a formal proceeding, and similarly for Hydro-Québec Distribution and TransÉnergie, maintaining 8.2% for both divisions.

BOND YIELDS

Government and corporate bond yields are often considered when setting authorized ROEs for utilities. As shown in the chart on page 3, after declining for many years, the long-term government bond yields (considered the risk-free rate of return) in both Canada and the U.S. increased from mid-2012 through mid-2013, but have since resumed their prolonged decline. While government bond yields play an important role in determining the authorized ROE for regulated utilities, changes in government bond yields do not imply a one-for-one change in the cost of equity for utilities. The relationship between government bond yields and the equity risk premium (the spread between government bond yields and the cost of equity) has historically exhibited an inverse relationship.

Going forward, Concentric anticipates that improving economic conditions and the withdrawal of accommodative monetary policy in both Canada and the U.S. will begin to exert upward pressure on the cost of capital for utilities over the next several years.

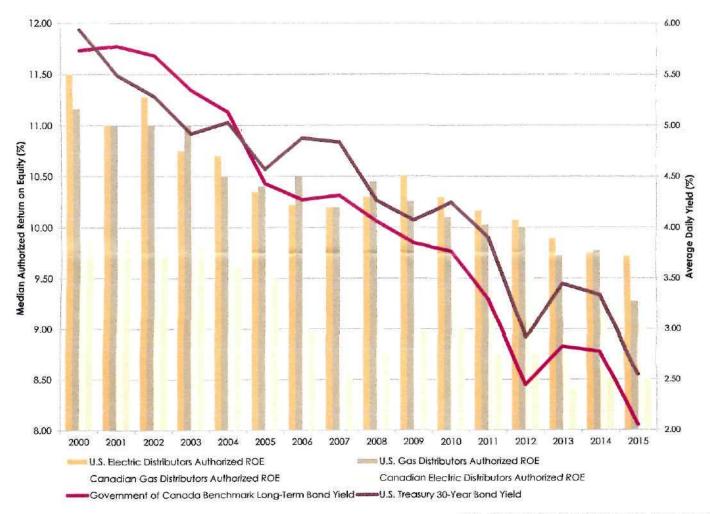

. .

NOTES

18

- 1. Data for an expanded group of Canadian gas transmission companies is contained in the Concentric Energy Advisors Return on Equity Database.
- 2. Allowed in rates for the corresponding year; where the year overlaps, the rate/ratio shown prevails for the majority of the year. Sources: Regulatory decisions and documents; annual information forms; annual reports.
- 3. The Alberta Utilities Commission's 2015 decision in the Generic Cost of Capital proceeding was retroactive. Returns on common equity and common equity ratios were adjusted for 2013–2015. This also affects the category averages for 2013–2015 as compared to those reported in previous years.
- 4. Beginning in 2014, the Ontario Energy Board updates cost of capital parameters for setting rates in cost of service applications only once per year.
- 5. FortisBC Energy (Vancouver Island) Inc. and FortisBC Energy (Whistler) Inc. were amalgamated with FortisBC Energy Inc. and are no longer separate entities in 2015.
- 6. Union's ROE per settlement agreement in its five-year incentive regulation plan for 2014–2018.
- 7. Source: SNL Financial LC's Regulatory Research Associates Division. Data for 2015 includes decisions through March 31, 2015.
- 8. Newfoundland and Labrador Hydro (NLH) filed a General Rate Application (GRA) on July 30, 2013. A decision has not yet been issued on that GRA. The Company subsequently filed a request for interim rates that was denied by the Board in Order No. P.U. 39 (2014), issued September 17, 2014. On November 10, 2014, NLH filed an amended 2013 GRA based on changes to the previous 2014 test year and a new forecasted 2015 test year. That amended GRA remains pending before the Board.
- 9. Average daily yield. Source: Bloomberg Finance L.P. Data for 2015 through March 31, 2015.
