Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy. Please reject this proposed rate hike for fossil fuels.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. Robeson County is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Funding more of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG's proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.

Sincerely,

Linda Brown

Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

Duke is not doing enough to directly protect the environment (shutting down coal ash dumps for example) or to switch to energy sources not dependent on fossil fuels. Until they show serious interest in moving away from the damage they are causing, rate hikes should be limited to rate of general inflation only

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy. Please reject this proposed rate hike for fossil fuels.

Dear North Carolina Utilities Commission,

Enough is enough. Duke Energy is a lying/cheating/greedmongering Climate Changing pig. They do not need nor deserve any more rate hikes. They have NOT cleaned up all of their foul superfund environmental messes here in NC. Please stand up to Duke for the sake of NC future and its' peoples futures.

Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

Thank you for considering the impact of rate hikes for working families. Duke Energy and PNG make tremendous profits already and that should not come at the expense of residents who are not given alternative choices for energy in our area.

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy. Please reject this proposed rate hike for fossil fuels.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. Robeson County is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Funding more of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG's proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.

Sincerely,

Brandon Moffitt

Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. This rate hike proposal could be used, in part, for building a newly proposed Liquefied Natural Gas storage facility in Robeson County. The county is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Both of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG's proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.
