Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid. It also provides customer choice in a state with an otherwise monopolized energy market. Utilities companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Please oppose any attempt to undermine these policies.

Thank you.

Sincerely,

Nicole Bowen

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, the state's existing policies support North Carolina's booming solar industry. Net metering reduces the need for expensive power plants and infrastructure, and drives local job creation and investment.

North Carolina's solar industry has helped our state rise to 2nd in the nation for added solar capacity in 2013, and we should be helping to drive the solar industry's growth rather than standing in its way.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Paul Moloney

Dear NC Utilities Commission,

Much talk is given to renewable energy and ways to reduce our dependence on oil. Power companies would like to keep it ALL and are fighting efforts to use less oil, so I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards. We must take steps to allow people to have rooftop solar and to reduce dependence on fossil fuels.

Thank you.

Subject: Docket E-100, Sub 83: Net Metering

My name is Diana Gricus and I will soon become a residential solar roof top owner. I believe that our investment in solar and other renewable energies is a responsibility we owe our current and future generations. The path we choose today can protect our families in the near future.

I DO NOT support changes to net metering that will kill roof top solar in North Carolina.

Please ask the Utilities Commission to oppose changes to net metering and help preserve our attempts to become investors in solar for our future generations.
