Duke do not raise our rates so you can make more money, and lower our monthly charges.

Duke Energy=A Monopolistic Company! Where is the accountability? They have added many items of cost to my utility bill- \$14.00 /month for service hookup -energy riders-storm fee-and the state added a consumption tax in 2013. Why must the customer pay again? We have no alternatives. Duke energy even controls solar energy panel use. This is unfairness!! Please protect citizens NOW!

### Message

I'm a Duke customer disgusted by Duke's latest carbon reduction plan and the plan to further raise rates for households while increasing reliance on high-pollution energy sources that are fueling climate change. Duke's a monopoly. Consumers have no choices. Duke Energy made \$4.3 Billion and their CEO was paid \$21 Million in 2022. They consistently make choices contrary to the interests of NC citizens. They operate only for profit- and you don't hold them accountable. The Utilities commission has allowed Duke to exploit citizens financially, choose non-sustainable energy sources, and put energy reliability at risk for too long. It's your job to keep them in line and protect NC citizens. Please do it.
