**Subject:** Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy. Please reject this proposed rate hike for fossil fuels.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. Robeson County is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Funding more of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG's proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.

Sincerely,

Ralph Lee

Dear North Carolina Utilities Commission,

So many cannot afford this, and the stockholders should pay for the cleanup required by Duke not individuals who have no input into these decisions. This is not right.

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy. Please reject this proposed rate hike for fossil fuels.

**From:** Sharon Schiro (sschiro@gmail.com) Sent You a Personal Message  
<automail@knowwho.com>  
**Sent:** Friday, July 26, 2019 7:33 AM  
**To:** Statements  
**Subject:** Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

I am concerned about the impact of this rate hike on those who are already struggling to afford to heat their houses. I'm also dismayed that some of these funds would be used to further the development of fracking in our state. Fracking puts our water supplies and environment at risk, and increase our risk of earthquakes (as seen in other states). We need to push for renewable energy sources instead of promoting development of energy sources that may ruin our environment.

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy. Please reject this proposed rate hike for fossil fuels.
