E-2, Sub 1320

Message

Rider charges to consumers are a imposition on the consumer. The consumer shouldn't be charged additional fees because the provider wishes to look in another direction or feels they are not making the profits they seek. To almost double a persons bill is robbery and should not be allowed.

My Duke energy cost are ridiculous. What is being done to lower these? I understand a 5.8% increase and another 4.8 but my bill is going up almost 30%. Almost \$100 rider adjustments. I will be charging the North Carolina's utility commission \$100 a month to put the meter on my house and give off radio magnetic energy. Please adjust my bill accordingly each month

Im contacting you regarded my light bill. There are alot of people furious about Duke Energy doubling their bill for no reason. Mine has went up over \$100 for no reason and there are "fees" that they cannot even tell me what theyre for. Im sick and tired of it. They have already had a lawsuit against them and i can almost bet that is why our bill has went up. WE are the ones paying for it. They think they can just do whatever they want and id really appreciate if you could do something about it

I understand you approved the rate increase for Duke Energy. My power bill is typically close to \$300. It was almost \$800!!!!!! This is not a small increase and Duke needs to manage their money to be able to pay for their own infrastructures!! Something needs to be done immediately to reverse this absurd hike in consumer bills!!!
