Subject: Rate hike *W- 354 July 360*

Woodhaven is a small development with two distinct demographics. One, retired individuals on FIXED (or decreasing) incomes. The second group, young families just getting established.

The proposed double digit increase in our water rates is unconscionable, and unwarranted. Since a large percentage of the increase goes to a base figure, there is no way a user can lower the monthly bill by conserving water. The bill will skyrocket regardless of how conscientious the customer is about saving water. That fact alone makes the proposal almost unpatriotic! Carolina Water should encourage conservation by lowering rates on the usage component of their request.

Sincerely,
Beth Nave
