RE: Docket E-100, Sub 83: Net Metering

Dear Commissioners:

Last July my wife and I installed our first PV solar panels. Part of the decision was based on lowering our electric bill via "net metering". If this rule is reversed, it will stop further extension of our solar energy efforts.

The economics will be changed. Since neither we nor others we have talked to are regulated utilities, we could begin billing Duke Energy for our product (electricity) they use.

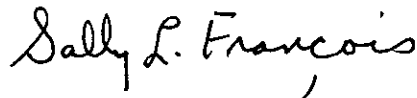

How does \$1.00 per watt hour sound? Our daily, monthly and life-to-date usage is available on a web site, so accounting would be very easy.

If you have any questions, please call me at (919) 787-7469.

Thank you for your attention to this matter.

Sincerely,

J. William Francois
