**Subject:** Docket E-100, Sub 180CS

I am a homeowner whose urban, tree-covered lot does not allow me to purchase rooftop solar. My energy consumption contributes to global warming. That bothers me. I cannot understand why there is resistance to adding solar panels to rooftops which are sunny.

Duke Energy ought to fund solar rooftop installations wherever feasible, and make it possible for all eligible owners to get them linked to the grid for free. We all benefit from increasing energy which does not harm the environment.

Earnings should not be the first factor in business decisions. I am a voice in the wilderness to ask for corporate responsibility.

The North Carolina Utilities Commission must enforce the law and conduct the required tests before agreeing to any compromise between Duke Energy and the fifty or so organizations which have joined the Environmental Working Group to protect our life-sustaining world.

Thank you,  
Emily Wilkins
