The 3rd paragraph of "Notice to Customers" Red Bird request from the Commission a rate based on purchasing and investing (\$1,235,000) in improvements to the system A&D currently serves. Red Bird also asks for a reasonable rate of return on their investment. Nowhere do I see the the purchase price nor the number of customer units Red Bird is purchasing from A&D. I think it would be transparent of Red Bird and the Commission to require Red Bird to start with a per unit cost which includes the purchase cost and the \$1,235,000 capital investment being made. At this starting point each customer will have the knowledge of just how much Red Bird is requesting as a ROI. I would like to know what the investment is and how it will improve each customers service, Thank You

I would like the North Carolina Utilities Commission to take into consideration that a rate change for the people that live in White Oak Village can and will cause financial stress for us because this is a 55+ Community and we live on fixed incomes. Red Bird plans to make approximately \$1,235,000 in capital improvements to the water and sewer systems across the A&D service area. Red Bird is asking the commission to approve increases to the customers to repay them for obtaining ownership of all of A&D systems. I feel it should be taken into consideration that the residents of White Oak Village are in a 55+ community and on fixed incomes and it would be difficult for us seniors to pay the same reimbursement fees as other residents of other communities.
