Subject: RE: Docket E-100 Sub 83

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. It's critical that we protect North Carolina's fair net metering policies because they are essential to fair consumer choice in our state.

Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid.

I am considering installing solar panels on my house. This issue is critical to my decision. Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Harry Taylor

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. Fair net metering policies ensure that customers receive fair credit for their contribution of clean, renewable energy to the grid. It's critical to support a transition away from dirty fossil fuels that pollute the air and water, threaten the public health and contribute to climate change.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Rita Roberts

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering supports residential solar energy generation and customer choice in a state with an energy market monopoly. There is also an inherent public good to have cleaner energy sources balance out large sources of dirty energy such as coal fired power plants.

Fair net metering policies support the booming solar energy industry in North Carolina. Please oppose any attempt to undermine these rules.

Thank you.

Sincerely,

Bill Camp

Clerk's Office  
N.C. Utilities Commission

Dear NC Utilities Commission,

I hope you will do the right thing here -- and...

Please keep North Carolina's net metering rules in place and give North Carolina customers a fair opportunity to lower their power bills. Power companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Thank you.

Sincerely,

HUGH ASHCRAFT

N.C. Utilities Commission

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering supports residential solar energy generation and customer choice in a state with an energy market monopoly. There is also an inherent public good to have cleaner energy sources balance out large sources of dirty energy such as coal fired power plants.

Fair net metering policies support the booming solar energy industry in North Carolina. Please oppose any attempt to undermine these rules.

Thank you.

Sincerely,

Geary Yelton

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. It's critical that we protect North Carolina's fair net metering policies because they are essential to fair consumer choice in our state.

Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Scot Scheuring

Clerk's Office  
N.C. Utilities Commission

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, net metering benefits solar and non-solar customers alike. It reduces the need for expensive, polluting power plants and it keeps energy dollars invested in local jobs and businesses.

Please keep North Carolina's net metering rules in place and give North Carolina customers a fair opportunity to lower their power bills. Power companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Thank you.

Sincerely,

Ted Fishman

Clerk's Office  
N.C. Utilities Commission

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. It's critical that we protect North Carolina's fair net metering policies because they are essential to fair consumer choice in our state.

Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Jennifer Thurmond

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering supports residential solar energy generation and customer choice in a state with an energy market monopoly. There is also an inherent public good to have cleaner energy sources balance out large sources of dirty energy such as coal fired power plants.

Fair net metering policies support the booming solar energy industry in North Carolina. Please oppose any attempt to undermine these rules.

Thank you.

Sincerely,

Nicole Massey

Dear NC Utilities Commission,

The use of solar power is spreading in North Carolina because individual families want to use clean energy. It is not surprising that Duke (coal ash) Power is attempting to undercut this movement in order to protect their bottom line. This would also undercut the rights of citizens to spend their money as they choose. I strongly encourage you to stand up for the rights of private citizens.

Clerk's Office  
N.C. Utilities Commission

Dear NC Utilities Commission,

I'm writing to you today in support of net metering and solar energy. It's critical that we protect North Carolina's fair net metering policies because they are essential to fair consumer choice in our state.

Net metering drives private investment by giving property owners the option to generate their own electricity while receiving fair credit for the surplus electricity they provide to the grid.

Please do not weaken North Carolina's net metering standards.

Thank you.

Sincerely,

Paul Lowder

925 New Garden Road, Apt. 1208

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering supports residential solar energy generation and customer choice in a state with an energy market monopoly. There is also an inherent public good to have cleaner energy sources balance out large sources of dirty energy such as coal fired power plants.

Fair net metering policies support the booming solar energy industry in North Carolina. Please oppose any attempt to undermine these rules.

Thank you.

Sincerely,

robert bilbro

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, net metering benefits solar and non-solar customers alike. It reduces the need for expensive, polluting power plants and it keeps energy dollars invested in local jobs and businesses.

Please keep North Carolina's net metering rules in place and give North Carolina customers a fair opportunity to lower their power bills. Power companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Dear NC Utilities Commission,

I support North Carolina's strong net metering policies. By encouraging private investment in clean energy, net metering benefits solar and non-solar customers alike. It reduces the need for expensive, polluting power plants and it keeps energy dollars invested in local jobs and businesses.

Please keep North Carolina's net metering rules in place and give North Carolina customers a fair opportunity to lower their power bills. Power companies should not be standing in the way of American ingenuity and customer choice to protect their old way of doing business. Our economy thrives on innovation, competition and choice.

Thank you.

Sincerely,

Robert Brooks

Dear NC Utilities Commission,

I support solar energy and net metering in North Carolina. Net metering supports residential solar energy generation and customer choice in a state with an energy market monopoly. There is also an inherent public good to have cleaner energy sources balance out large sources of dirty energy such as coal fired power plants.

Fair net metering policies support the booming solar energy industry in North Carolina. Please oppose any attempt to undermine these rules.

Thank you.

Sincerely,

John van Arnold

Clerk's Office  
N.C. Utilities Commission

To the Chief Clerk of the Commission:

I am a homeowner in the state of North Carolina who, several years ago, became the first individual in my community to have rooftop solar panels installed. It is my understanding that changes to net metering are being proposed that would benefit Duke Power, and at the same time would significantly devalue my investment. Needless to say, I am strongly against any such changes and ask that the Utilities Commission not allow such changes to occur. Thank you for taking the time to consider my opinion.

Sincerely,

Bo William Kopynec

## FILED

APR 14 2014

Clerk's Office  
N.C. Utilities Commission

To Chief Clerk of the Commission:

I write to you concerning the changes to net metering being proposed by Duke Energy Progress as both a resident/customer who has invested in a roof top solar array and as a member of the local home building industry dedicated to high performance home building in our area. I DO NOT support changes to net metering that will kill roof top solar in our state. I ask that the Utilities Commission oppose these changes to net metering, and in so doing, not strengthen the electric monopoly, but instead stand up for the individual consumers dedicated to acting on behalf of our environment by producing clean energy.

Regards,  
Jon
