Good morning Chuck,

- Has there has been expansion of this system or an interconnection?
 - *I am unaware of any other connections other than the approved Creekwood, Stoneridge and Sedgfield systems.*
- Is there a more recent plan and specification approval than the one attached that lists the number of single-family lots to be served by Stoneridge?
 - *No. We currently have 266 residential connections.*
- A member also suggested that the Fire Marshall indicated the hydrants should be painted black, any context we are missing here?
 - *Aqua has already met with the Fire Department on several occasions and have painted the tops of the hydrants black per their instruction. There are also hydrant tags being installed on the hydrants stating for flushing purposes only. Those tags are on order.*
- What is the flushing frequency?
 - *Once a year outside of emergency flushing*
- Does Aqua have a flushing diagram/plan for the system?
 - *Due to the recent new valve installations, Aqua is currently creating an updated flushing diagram and will supply if requested. The current flushing map is attached.*

Quick follow-up, when we spoke to the Ad Hoc Water Committee there was a suggestion that there has been expansion of this system or an interconnection. I am not aware of such an occurrence. Is there a more recent plan and specification approval than the one attached that lists the number of single family lots to be served by Stoneridge? A member also suggested that the Fire Marshall indicated the hydrants should be painted black, any context we are missing here? What is the flushing frequency and does Aqua have a flushing diagram/plan for the system?

Thanks,
Chuck

Good afternoon,

Stoneridge Master System Water Main Valve Installation update –

Four out of the six valves we planned to install this year have been successfully installed. The remaining two water main valves are scheduled to be installed this Friday. We are currently flushing this system as we do this work. We also plan to do a more systematic flush soon after this project is completed.

Thanks,

Rob
