**Subject:** Docket E-100, Sub 180CS: Comment from Habitat for Humanity

Dear members of the North Carolina Utilities Commission,

I am a volunteer for Habitat for Humanity in Chatham County. I have seen the economic advantages that solar energy brings to homeowners with low to moderate income, not to mention the advantages to the environment.

As I understand it, the change proposed by Duke Energy to the net metering rules would increase costs and would effect the financial stability of these families.

Please consider these factors as you deliberate on the proposed policy change.

Thank you.

Regards,
