Clerk's Office
N.C. Utilities Commission

Please see that NCUC conducts a full review of Duke Energy's plans to build the Anderson, SC natural gas plant before it is built. NC ratepayers would stand to pay 70% of the cost of building this plant.

Would the natural gas come from fracking? If so, this opens a can of worms because of the environmental impact of the facility. NC WARN is watching to see what you do. Like California, NC could turn to other ways of producing or saving energy. Please think with your ideas open.

Thank you.
