Greetings,

I am very concerned that Duke Energy/ Power wants to interfere with access to rooftop solar.

They are trying to make it complicated and in a time when our earth is needing more Eco friendly ways to produce energy.

Thanks,

Theresa Russell

Please don't let Duke Energy ruin the Solar industry in NC. We need to be doing more to further Green Energy and get us less dependent on fossil fuels instead of going backwards. Nobody wants Duke to lose money, but that doesn't mean they have to make huge profits either. They are essentially a monopoly. Monopolies shouldn't be allowed to make huge profits at the expense of their customers.

Thank you,  
Jennifer Pitts

In my recent research into home solar panel installation facts, I have learned of Duke Energy's proposed program to attack net energy metering. In fact, this policy will discourage new installations by punishing those homeowners with panels to subsidize those without. Payback time for costs will be lengthened and Duke's new gas-fired generation plants subsidized by "fracked gas" at a time when our planet's needs are just the opposite!
