Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

A company should make a profit, but robbing third customers to pay their shareholders is unconscionable.

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy. Please reject this proposed rate hike for fossil fuels.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. Robeson County is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Funding more of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG's proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.

Sincerely,

Phyllis Applekamp

Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

Some people are struggling to pay for bills as it is and with an fee hike, they would have to choose between what to pay for, particularly in the colder months.

Duke Energy, owner of PNG, was fined for coal ash spills. This hike would mean that whenever Duke Energy gets fined, it just jumps its prices to cover the cost, meaning we, the victims of spills, are the ones paying for our own demise.

Stand up for the little man, for the working people, and stand against the PNG rate hike.

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy. Please reject this proposed rate hike for fossil fuels.

Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

Duke Energy and PNG make plenty of money. Duke Energy is already skinning it's electric clients by making them pay for the ash spills from ponds and along rivers which management knew would not be safe. Their business decision, should be management's expense, not ours. Now PNG wants to raise rates for more fracked gas. This simply will destroy more water sources in the earth by injection of poisonous chemicals to release the gas. It's time both of these companies do something to promote cleaner energy. And, stop exploiting their customers to line corporate pockets.

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy. Please reject this proposed rate hike for fossil fuels.

Subject: Docket No. G-9, Sub 743: No more rate hikes for dirty energy

Dear North Carolina Utilities Commission,

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy. Please reject this proposed rate hike for fossil fuels.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. Robeson County is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Funding more of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG's proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.

Sincerely,

Lynn Durham

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy. Please reject this proposed rate hike for fossil fuels.

Piedmont Natural Gas (PNG) is owned by Duke Energy, the largest utility in the United States. They are among the largest emitters of greenhouse gases in the country. Robeson County is already home to the terminus of a proposed \$7.8 billion dollar fracked gas pipeline. Funding more of these unnecessary, dangerous, and dirty projects are uncalled for.

As part of the largest energy producer and purchaser in the state, we urge the utilities commission to reject Duke Energy and PNG's proposed rate hike. We need to be investing in cleaner, cheaper, renewable energy as a state. Building more stranded assets that rely on fossil fuels will leave some of the poorest places holding the bill.

Sincerely,

Billy Simpson

Dear North Carolina Utilities Commission,

Tired of Duke Energy and other businesses like Duke, jacking up the cost of the services to do these projects that are effecting our wallets and the environment. Enough is enough! They're not even thinking about the children and the mess they will be dealing with after were gone. It's not right!

I'm writing to ask the Utilities Commission to side with the people, families, and businesses who cannot afford another rate hike for dirty energy. Please reject this proposed rate hike for fossil fuels.
