Dear Sir:

Three years ago, I installed solar panels on my home. The installation was a significant investment, but the cost savings and the personal satisfaction knowing that I am helping the environment made this expense very acceptable. I am writing to object to Duke Energy's tariff request. I ask you to consider maintaining the net metering system that is in place which seems to be fair and equitable. Thank you for your service and consideration.

Sincerely yours,

William K. Campbell, M.D.
