### Docket

E-2, SUB 1219

### Message

After reading this very small docket (very small size & print) accompanying my current electric bill from Duke Energy Progress, I was amazed to see they want an increase of approximately 15.6% over current revenues. One of the specifics is to " (5) responsibly close coal ash basins and operate active coal plants" - 3rd paragraph on the front page. Also, that their proposal would increase residential service revenues by 18.0%, reduced by riders to 14.3% with the effect of all riders to 14.4%. I for one think this is totally unacceptable, and I would hope the commission thinks so to. I feel the affects from the last increase and really don't need anymore. Responsibly building and maintaining coal ash basins should have been their priority from the beginning.
