Subject: Updated site plans in several dockets

Mr. McGovern,

The Utilities Commission has received and filed Cypress Creek's updated site plans in the following dockets:

SP-4340, Sub 0
SP-3797, Sub 0
SP-4287, Sub 0
SP-5549, Sub 0
SP-5523, Sub 0
SP-4323, Sub 0

However, the Commission needs additional information and clarification concerning the changes to the site plans for these facilities. It would be helpful if you will describe in a couple of sentences what has changed. For example: "The footprint for the solar panels has been shifted approximately 300 yards to the southwest." Or "Five additional acres have been added to the site plan on the northeast boundary."

In addition, it would be helpful if you will file a map or maps for each facility that shows the new site in relationship to the original site.

A good example that illustrates both of the above points is the Amended Application filed July 17, 2015 in Docket No. SP-4260, Sub 0.

Thank you for your assistance. Please let me know if you need any additional information.
